feeling wood

## For 50 years we have been bringing our Made in Italy logo to the world

A greater part of our life takes place on a floor, whether on ceramic or terracotta tiles, stone or wood.

Wood, in particular, represents a discreet, background presence in our existence. Warming, embellishing and painting it with the colours of nature.

In most cases it will survive to us. This is the reason why, the quality and the unique design of the Italian products are always synonymous with elegance and durability, as well as, and even more so than a dress or a piece of furniture.

Stile, thanks to its experience and the technology used, is without doubt the most reliable interpreter of this uniqueness.

Choosing a Stile product, you don't only buy a wooden floor, but you also make a lifestyle choice and one of belonging because, in the world of "quality wooden floors" is written "made in Italy", but it is pronounced Stile.

---

### 1965

Trading and installation of mosaic wood floors.

### 1974

The production of the line Tradizionali with Lamparquet and Listoncini got under way.

### 1985

Introduction of new plants for Tradizionali and Big employing advanced automation systems.

### 1995

Production of the pre finished two layers wood floor, called Stilnovo 70/90.

### 2008

Widening of the Stilnovo family with models L and XL and completing of the line thanks to the introduction of the floors for outdoors. Start up of the new automatic warehouse and beginning of widening of the line of engineered prefinished Stilnovo.

## Made in Italy

The Italian flag is not just arbitrarily applied to the company's packaging and catalogues but has been used since 1965 as an indication of quality. We bring the Made in Italy quality to over twenty countries around the world.

## Components of excellence

A multi-layer wooden floor is composed of many components, which must work together in harmony. Stile has selected only the best types of wood, the best multi-layers. Glues and varnishes are used to guarantee the maximum stability and durability over time.

## High Technology

Using the most advanced technology allows Stile to carry out and monitor the entire production process (gluing, pressing, varnishing and shaping). Unlike those who import finished or semi-finished products of dubious origin, Stile is able to trace 100% all stages of production, guaranteeing quality and efficiency.

## Service

The new generation of automated warehouse allows for much more efficient logistical organisation, and offer a unique logistical supply.

## Transparency

Stile is a transparent company that has obtained all the necessary, certified guarantees for quality and compliance with all legal considerations and in particular consumer protection.

## Sustainability

FSC and PEFC certified raw materials, modern production facilities and the reduction of environmental impact, in respect to all health and safety regulations allow Stile's products to be labelled as "Environmentally Friendly".

## Finishes

Thanks to Stile's partnership with Bona, a world leader in wooden floor finishes, Stile has unique finishes available such as Natural UV and Traffic UV. Its unique performance and advantages in terms of care and maintenance are unrivalled in the market.

## Product range

We offer the widest range of wood flooring products. Pre-finished floors in several collections, solid wood design and outdoor flooring, are available. All "Made in Italy" products meet the most stringent of demands.

# Finiture

Innovating means trying to make simpler and functional what is already naturally beautiful.

Finishes Naturele UV and Traffic UV developed in collaboration with Bona, world leader for wood floor Finishes, allow Stile to choose the most suitable and performing finish for the chosen wood floor.

Natural UV finish allows you to have two uncommon elements in only one finish: the protection and practicality of a Varnished floor as well as the naturality and restoration typical of oil Finishes.

After the big success of Natural UV finish, Stile and Bona have decided to make Traffic, the world mostly used high resistance varnish, available exclusively on Stile prefinished floors.

Traffic UV is a finish for wood floors with a very high protection level against wear and tear, perfectly transparent and without compromises in terms of functionality and maintenance.

## PRESANDED

Untreated surface in order to emphasize the wood texture.  
Ready to be finished according to the customer's wish right after installation.

	Practical
	Genuine
	Resistant
	Restore
n/a	Taber Test® Resistance to abrasive wear
n/a	Reaction to fire classification

## OILED

Neutral oil treatment. It preserves the beauty and the nature of the wood. This kind of finish requires specific procedures for ordinary maintenance.

	Practical
	Genuine
	Resistant
	Restore
n/a	Taber Test® Resistance to abrasive wear
n/a	Reaction to fire classification

## NATURALE UV

High resistance acrylic varnish dried with UV lamps. It combines the natural feeling of the wood conveyed by an oiled finish with the high performance granted by the varnish. This innovative finish, unlike standard varnishes, allows an easy maintenance and local repairing.

	Practical
	Genuine
	Resistant
	Restore
2.000 rpm	Taber Test® Resistance to abrasive wear
CFL-S1	Reaction to fire classification

# Lifetime support

Integrated system for life time care and maintenance of the floor with Bona products and equipments

## VARNISHED

\*8 coats acrylic varnish finish, glazed look. Very resistant.

■ ■ ■ ■ ■	Practical
■ ■ ■ ■ ■	Genuine
■ ■ ■ ■ ■	Resistant
■ ■ ■ ■ ■	Restore
<b>3.000 rpm</b>	Taber Test® Resistance to abrasive wear
<b>CFL-S1</b>	Reaction to fire classification

## TRAFFIC UV

\*The most used high resistance varnish in the world is now exclusively available on Stile's prefinished floors. Very high protection toward the stamping, completely transparent grants a great performance and an easy maintenance.

■ ■ ■ ■ ■	Practical
■ ■ ■ ■ ■	Genuine
■ ■ ■ ■ ■	Resistant
■ ■ ■ ■ ■	Restore
<b>5.000 rpm</b>	Taber Test® Resistance to abrasive wear
<b>CFL-S1</b>	Reaction to fire classification

\*The Traffic UV finish looks like the Varnished finish: same gloss (around 20) and same smoothness. The only difference is a special component applied on the Traffic application process that give the special resistance at the abrasion for this finish that is particularly suited for heavy traffic locations (airports, hotels, stores, etc.)

SMOKED

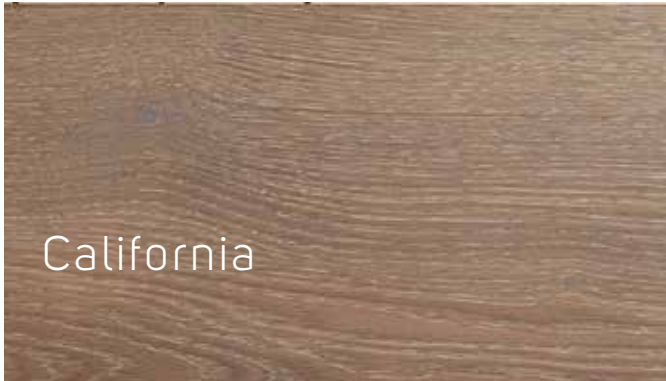

A collection made with slightly brushed "smoked" Oak. The special treatment with reagents allows the natural tannin of wood to colour and emphasize the grains and the planks characteristics. By using this material as a platform, other warm and intense shades were created: they match the antique character with the modern aesthetic trends. It's available in 4 sizes: 120-140-180-240 mm wide, all with Naturale UV finish.

LAB

Welcome to the Stile Laboratory for new experiments and prototypes!

Technology is keeping renewing itself and providing new opportunities to develop new products and applications. From applying a thick lacquering treatment to match every color, to the application of real metal laminas on the wood or by adopting the digital printing technique that can reproduce any texture of picture on the wood...Stilelab is all that! Furthermore Stilelab is all about custom products and finishes, that give the chance to architects and designers to create together with Stile the best personalized solution for their projects.

HERMITAGE

Hand-cut

The big experience in the treatment of a wide range of wood species and the neverending development of modern technologies, led to the creation of a new line of inlays.

The wide range of inlays is shown in three different lines of application: decorated floors, for those who love to characterize in a special way their house with finely decorated components which, laid one close to another, create an elegant and important floor; borders: decorative borders which represent the ideal choice for those who want to enrich their wood floor, making it even more glamorous and refined; designs : made with selected wood species are proposed in different solutions studied to enrich the rooms with different styles (modern, classic, country) and surfaces.

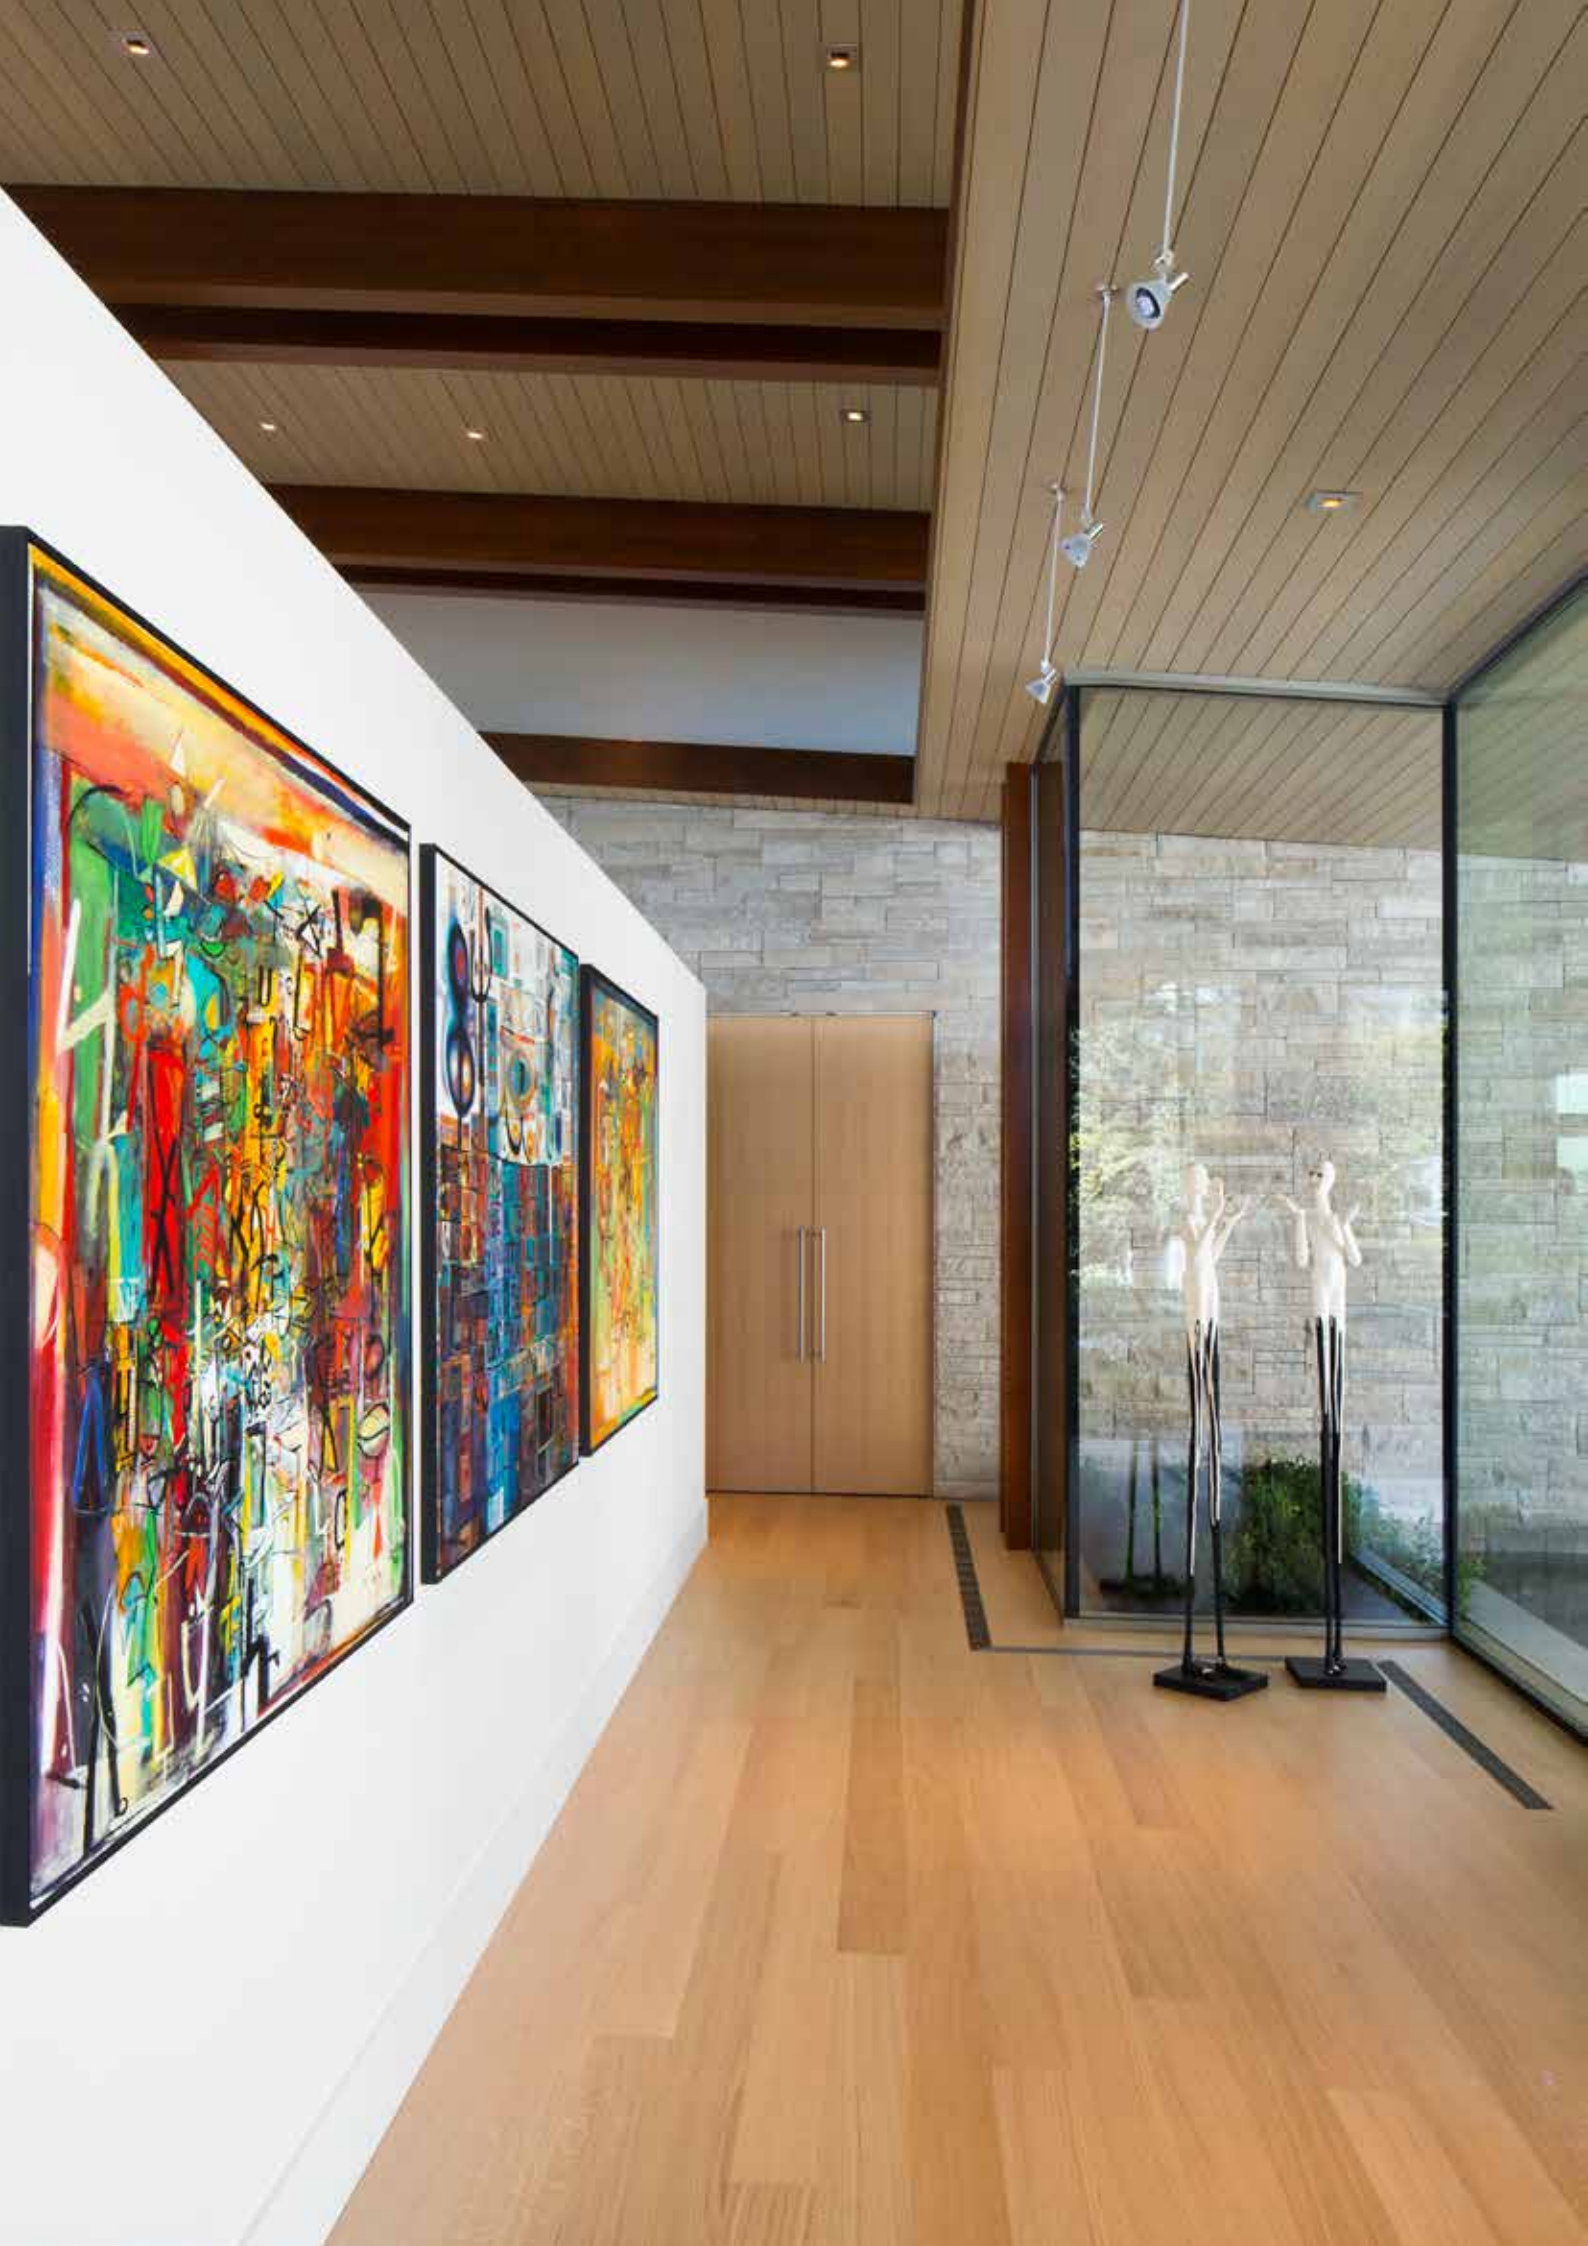

STILDECK

Stildeck is the collection of wood flooring for outdoors.

Only available in Teak, it can be installed with clips or with screws at sight.

## Certificazioni

Stile has a management system certified ISO 9001:2008.

According to UNI EN 13489 regulation standards only a solid or engineered wood flooring with a minimum thickness of the wear layer of 2.5 mm can be qualified as "parquet".

Stile's products are in conformity with UNI EN 14342-2005 + A:2008 regulation for CE mark.

F★★★★ : Formaldehyde emission level according to the Japanese main standard.

E1: Stile's products are included in E1 category of Formaldehyde emission.

FSC trademark identifies products made with wood from forests managed in a correct and responsible way in accordance with strict environmental, social and economic standards.

Forest Certification scheme which promotes a sustainable management of the forests.

Stilnovo products with varnished, Naturale UV, Naturale UV White finishes are included in the Cfl-s1 class with reference to the UNI EN 13501-1 2009 regulation.

The Green Building Council Italia is the Italian association of leaders that operate for directing the building industry toward the environmental sustainability and to build good-living communities.

This is a communication project that highlights usually unreported product's features, in addition to what is already regulated by the law, in order to put the end customer and the distributors in a position to make an informed choice.

The Birch multilayer used ad support is 100% FSC certified. Oak wood can be FSC certified.

The Birch multilayer used ad support is 100% PEFC certified. Oak wood can be PEFC certified.
