

## Surface Architectural Supply

We are located in Richmond's historic Scott's Addition, named for Winfield Scott; the longest serving General in American history. Situated at the corner of Belleville and Leigh, Surface invites you to visit our showroom and 19,000 square foot factory.

## Craftspeople, artisans, designers, makers . . .

We wear many hats but at the core, our passion for unique materials and design is what inspires us.

Recovering wood from vintage barns and other idle structures across the country, our corps of exceptionally skilled craftsmen transforms these salvaged materials into surfaces that have a new story to tell as they dovetail historical spirit with innovative design.

Our team creates flooring, wall paneling, furniture and other architectural components for residential, commercial and hospitality venues both domestically and internationally.

Founded on 25 years of experience in the woodworking industry, we are committed to the conservation and responsible stewardship of our limited natural resources.

Responsibly Sourced, Repurposed, Sustainable.

surfaces

Featuring wide planks up to 12 inches, our random width flooring epitomizes the art of refined living.

Natural hues of cocoa, hazel and amber mingle with the patina of well-seasoned woods creating warmth in all environments.

We salvage Oak, Heart Pine, Chestnut, Silver Gray Board and Brown Board. Walnut and Cherry are our standard sustainable woods, however we have access to other species of reclaimed and sustainable lumber.

## Surface Texture

**Original:** The surface and patina of the wood is preserved in its original condition.

**Hit & Miss:** Some of the original surface is removed to reveal the wood beneath.

**Smooth:** The material is completely resurfaced.

Our reclaimed paneling is the ultimate architectural feature, providing unrivaled visual appeal.

Reinventing spaces? From our unique and innovative surfaces such as Rake Board paneling to the more traditional Silver Gray Barn Board, our mission is to expand the palette provided to the design community. Challenging the senses and provoking emotion, our materials pay homage to the past while integrating with the modern environment.

## Bring imagination to the Surface.

Clean lines, an uncluttered aesthetic and good old-fashioned ingenuity inform our designs.

Hand-crafted, our furniture is made exclusively from authentic materials. We introduce a uniquely diversified mix of materials, found object and artistry to each project.

“Furniture” or “functional art”? We will let you decide.

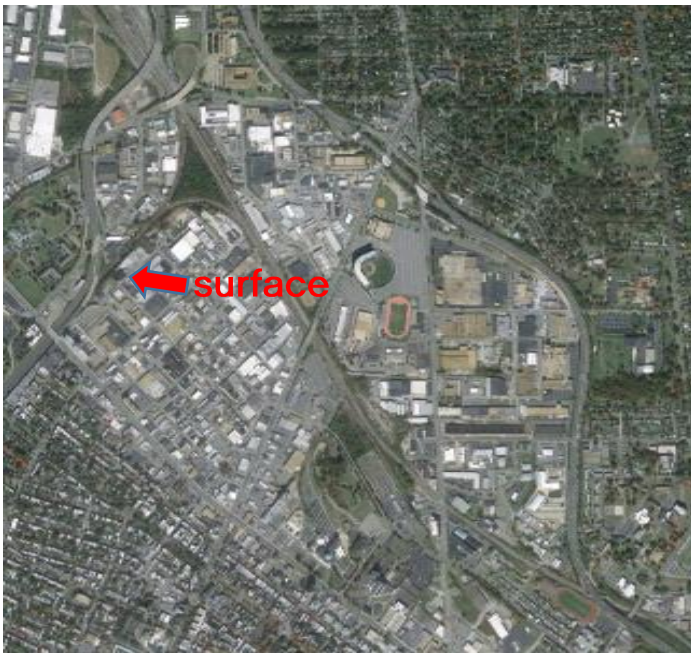

furniture

## Responsibly Sourced, Repurposed, Sustainable

We salvage beams, joists, framing timbers and siding from vintage structures throughout the mid-Atlantic region. Our reclaimed materials come from the foothills of West Virginia, the farmlands of Pennsylvania and the tobacco fields of North Carolina. Our sources as well as our inventory continue to grow. Most of our woods come from structures that are at least a century old, with several dating back to the Civil War era.
