1 Gallon

How to Use

Before Use: Always test a hidden section of the carpet for color fastness. For dry stains or spots, vacuum area to be treated first to remove any loose soil.

For wet stains or spots, blot the area with a dry clean colorfast cloth or sponge to remove any excess material.

For Spots and Stains on Carpets, Rugs & Upholstery:

Step 1: Remove as much of the spilled stain substance as possible.

Step 2: Apply a liberal amount of **Stain Remover** directly on the stained area.

Step 3: Gently massage **Stain Remover** into the soiled area using a clean dry cloth, lightly dampened sponge or a nonabrasive brush working toward the center of the stain.

Step 4: Blot any residual moisture from the area until the stain or spot no longer transfers from the carpet to the cloth or sponge. Re-apply and repeat this step until stain or spot is removed.
