

Professional Disinfection Effective Against Virus Spread

Professional-grade disinfection solution meets CDC/EPA efficacy requirement against the Coronavirus (COVID-19).

Disinfecting public areas is a key step in reducing Coronavirus spread. Hand-wiping surfaces is minimally effective compared to **professional atomizer fog application**, which reaches all surface areas to kill 99.999% of bacteria.

Professional disinfection with atomizer fog application is effective for corporate office spaces, transportation centers, retail environments, and hospital/medical facilities.

Supplies of all types face availability challenges. However, we currently have adequate supplies of qualified disinfection solutions and labor resources to meet your disinfection needs.

We are here to help you. Please contact me to learn more or schedule professional disinfection treatments for your facilities.

Mr. Davids Flooring International is now Diverzify.

Mr. Davids Flooring International has transferred all assets and operations to Diverzify, a nationally resourced and technology-enabled commercial construction flooring installation leader. Learn more at www.diverzify.com
