

SURFACE CARE

The RD Weis Surface Care program is
the single source, standardized maintenance solution
for your entire organization

The RD Weis Surface Care program is comprised of key components that create clean and healthy facilities

Spotlight On:

Upholstery Cleaning

RD Weis uses a four-step process on your curtains, blinds and upholstery to ensure your facility and employees stay clean, healthy and free from airborne pathogens.

Step 1 – Remove dust and dirt by vacuuming.

Step 2 – Pre-treat spots with a spot cleaner. We always test a small, inconspicuous area with spot remover before treating the stain. You want to make sure the color doesn't fade and that the fabric doesn't become damaged.

Step 3 – Scrub the panel or upholstery using a soft bristle brush and panel and upholstery cleaner. Panel and upholstery cleaner can be mixed in a bucket, then brush dipped.

Step 4 – Upholstery is cleaned with a specialized, very low moisture extraction. Extract lightly so as not to over wet panels or upholstery.

Protect and enhance the quality of your facility's environment with RD Weis
SURFACE CARE maintenance services.
